Summary

Frontend-focused SDE with 1.5+ years of experience owning and shipping production-grade React Native and React applications at scale. Delivered 10+ features and platform upgrades across 3 internal products and 1 B2B app, reduced app crashes by 98%, cut build times by 50%, and consistently drove measurable performance improvements. Effective user of AI-assisted development tools (Claude Code, Cursor) to accelerate delivery.

Experience

Spinny — Software Development Engineer I **Nov 2024 – Present**
Gurgaon, India

- Took full ownership of 3 internal production apps and 1 B2B app and CRM domains, driving feature delivery, upgrades, and platform stability end-to-end.
- **Reduced app crashes by 98%** through systematic debugging, Sentry integration, and targeted code hardening across the procurement app.
- **Cut CRM build time by 50%** (10–12 min → 5–6 min avg) through build pipeline optimisation, directly improving team development velocity.
- Built a ground-purchaser procurement app from scratch to replace an off-the-shelf tool (Google AppSheet), paired with an admin dashboard for business monitoring and delivered end-to-end independently.
- Built a vendor app to reduce parts procurement turnaround time, with Excel export and a polished admin dashboard, improving supply chain visibility.
- Built a manpower dashboard with full CRUD, role-based access control, and optimised API call strategy and reducing unnecessary network requests while maintaining real-time accuracy.
- Revamped the internal catalogue dashboard with caching, scalable architecture, and direct user research with ground staff to iterate on UX improvements.
- Delivered a budget approval feature enabling node addition and modification from inspection data, and pod reassignment across job rows in the refurbishment workflow.
- Shipped a cross-technician job sharing feature allowing technicians to push and pull tasks across queues in real time, improving workload distribution on the floor.
- Implemented wireless file transfer from a hardware tunnel device to the inspector app with zero backend dependency, eliminating a separate integration flow entirely.
- Upgraded React Native across two apps (0.70 → 0.83 and 0.73 → 0.85), enabling New Architecture, iOS compatibility, and 16KB Android compliance - **reducing downloadable app size by 5MB**.
- Upgraded the inspection library from v2 to v4 and modernised legacy code across apps as part of the architecture migration.
- Mentored an intern throughout their tenure, providing technical guidance, code reviews, and unblocking day-to-day challenges to help them contribute independently.
- Fixed a critical logout bug in the refurbishment dashboard affecting session management across user roles.

Projects

Cosmetic E-Commerce Store **Jan 2024** *Next.js, Redux Toolkit, Tailwind CSS*

- Built a full-featured storefront with dynamic product pages, blog, and cart; leveraged Next.js SSR/SSG for performance and SEO.

Travel Blog Website **Dec 2023** *Next.js, React, Tailwind CSS, BaaS*

- Integrated a headless CMS for content management with dynamic routing for country listings and detailed blog posts.

Skills

Languages: JavaScript, TypeScript, CSS, Sass **Frameworks:** React, React Native, Next.js, Expo

State & Tools: Redux, Context API, React Navigation, Git, Firebase, Sentry, GrowthBook

Productivity: Claude Code, Cursor, Antigravity **Design:** Figma, Adobe Suite, Claude design, Google Stitch

Education

Jaipur Engineering College and Research Centre **2020 – 2024**

- B.Tech, Computer Science & Engineering CGPA: **8.6/10**

Children's Academy Convent School, Alwar **2019 – 2020**

- CBSE Board (Class XII) Aggregate: **78%**

Chinar Public School, Alwar **2017 – 2018**

- CBSE Board (Class X) Aggregate: **71.8%**
